Lack of Catalytic Activity of QM-Derived Structures in Topology and Parameter Optimization for Gold Nanoparticles. A recently reported topology and parameter optimization procedure for gold nanoparticles (AuNPs) was tested using the quantum mechanics (QM) method for the purpose of validation. The molecular formula of a common organic solvent used in the synthesis procedure was optimized using the high level of theory, and the optimized molecular structures were assessed for their potential to optimize the formation of AuNPs. A series of molecular structures were synthesized and their potentials to form AuNPs were assessed. It was shown that the optimized molecular structures capable of optimally controlling the formation of AuNPs are far beyond their simple molecular structures. From the demonstrated calculation, it was confirmed that the calculated potentials of molecular structures capable of optimally controlling the formation of AuNPs do not exhibit any logical correlation with their potentials to be surface functionalized by organic molecules, at least in the case of the test molecules. This finding is the first step toward the design of high-quality synthetic materials for optically active nanostructured materials. Rome adds in Williams and Kubica as former driver Fernando Alonso retires from F1 Getty Images - ROME (AFP) – Formula One drivers' champion Fernando Alonso is retiring, forcing a reshuffle of the grid, and two ex-F1 racers have been signed by new owner Liberty Media. After five hugely successful years in F1, champion and 2008 world champion, Alonso said in a message posted on his website that the time had come to "close the door on a new chapter in my life." "I have been very fortunate in my career, not just to have won the drivers' championship, but also achieve eight pole positions and seven victories," the 38-year-old Spaniard said. "However, this is a decision which does not come easily, and to do that, I need to take some time to fully weigh up my options. "Racing professionally for more than two decades is a huge privilege, and I cannot wait to put down my helmet for the final time as a competitor 50b96ab0b6
